

Suraj Patel

Email: surajpatel9390@gmail.com | Phone: +91 9260923895 | Address: Lucknow, Uttar Pradesh, India
GitHub: github.com/SurajPatel04 | LinkedIn: linkedin.com/in/suraj-patel-9201b2381/ | Portfolio: surajpatel.dev

Software Engineer with a strong foundation in high-performance backend systems, real-time architecture, and Data Structures & Algorithms. Skilled in agentic workflows, scalable REST APIs, and streaming pipelines. Focused on production-ready systems, latency optimization, and data-driven solutions.

EDUCATION

Master of Computer Applications (MCA) | Amity University Online, Noida
Bachelor of Science | Lucknow Christian College, Lucknow

2024 – Present
2021 – 2024

PROFESSIONAL EXPERIENCE

Full Stack Engineer Intern | Careerboat.ai

Dec 2025 – Present

- Developed AI interview APIs using Node.js with LangChain and LangGraph, generating context-aware questions based on resumes, skills, and prior responses, while optimizing token usage through state management using MongoDB check pointers and dynamic context summarization.
- Orchestrated TTS, AWS S3, and SSE for real-time audio streaming and token-by-token AI responses.
- Developed an AI-powered resume analyzer to evaluate job description match rates, identify skill gaps, and dynamically generate tailored resumes.
- Orchestrated the Razorpay payment gateway to process secure user transactions, implementing custom backend logic to support discount coupons.

PROJECTS

InsightFlow | github.com/SurajPatel04/ai-multimedia-rag-app | insightflow.surajpatel.dev May 2026

- Built a full-stack **multimodal RAG platform** using FastAPI, LangGraph, React, MongoDB, FAISS, Redis, and SSE for PDF/audio/video question answering with source citations.
- Designed a two-phase ingestion flow with temporary upload storage, confirmation-based promotion, and cleanup to eliminate wasted embedding cost.
- Integrated Deepgram for timestamped audio/video transcription and implemented clickable media citations for precise retrieval and playback.
- Implemented Redis semantic caching for repeated queries, LangGraph-based conversation memory management, and GCP deployment using Docker and GitHub Actions CI/CD.

AI Interview | github.com/SurajPatel04/AI-Interview | interview.surajpatel.dev May 2025 - Aug 2025

- Engineered a full-stack AI-powered interview system using React, Node.js, and MongoDB, generating context-aware questions from resumes, skills, and user responses using LangChain and Gemini.
- Engineered a real-time interview system with WebRTC and Socket.io, integrating streaming audio and TTS, reducing next-question API response latency from ~8–10s to ~3–6s using Redis caching.

TECHNICAL SKILLS

- **Languages:** JavaScript | TypeScript | Python
- **Frontend:** React | Redux | HTML5 | CSS3
- **Backend:** Node.js | Express.js | FastAPI | REST APIs | JWT | OAuth 2.0
- **Databases & Caching:** PostgreSQL (Prisma) | MongoDB (Mongoose, Beanie) | Redis
- **AI:** LangChain | LangGraph | LangSmith
- **Tools & DevOps:** Docker | Git | GitHub Actions | Celery (Task Queue System)
