Profile Summary

Software Engineer focused on agentic AI workflows, RAG pipelines, and real-time backend systems. Experienced shipping LLM-powered applications with FastAPI, Node.js, and LangGraph, with a record of latency optimization and cloud deployment.

Technical Skills

Languages: JavaScript, TypeScript, Python

Frontend: React, Redux, HTML5, CSS3

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, OAuth 2.0

Databases & Caching: PostgreSQL (Prisma), SQL, MongoDB (Mongoose, Beanie), Redis, FAISS (Vector DB)

AI: LangChain, LangGraph, LangSmith (LLM observability), OpenAI API, Gemini API, RAG, Prompt Engineering

Tools & DevOps: AWS (S3), GCP, Docker, Git, GitHub Actions, Linux, Bash/Shell, Celery

Core Fundamentals: Data Structures & Algorithms, System Design

Professional Experience

Full Stack Engineer

Dec 2025 – Present

Careerboat.ai

- Developed AI interview APIs using Node.js with LangChain and LangGraph, generating context-aware questions based on resumes, skills, and prior responses, while optimizing token usage through state management using MongoDB check pointers and dynamic context summarization.
- Orchestrated TTS, AWS S3, and SSE for real-time audio streaming and token-by-token AI responses.
- Developed an AI-powered resume analyzer to evaluate job description match rates, identify skill gaps, and dynamically generate tailored resumes.
- Integrated the Razorpay payment gateway for secure transactions, with custom backend logic for discount coupons.

Projects

InsightFlow – Multimodal RAG Platform

May 2026

insightflow.surajpatel.dev | github.com/SurajPatel04/ai-multimedia-rag-app

- Engineered a full-stack multimodal RAG platform (FastAPI, LangGraph, React, MongoDB, FAISS, Redis, SSE) enabling Q&A over documents (PDF, Word, Excel, CSV) and media (audio, video) with inline source citations.
- Designed a two-phase ingestion flow that promotes uploads only after confirmation and cleans up the rest, eliminating wasted embedding spend on unconfirmed files.
- Integrated Deepgram for timestamped transcription with clickable media citations, enabling precise retrieval and playback to the exact second.
- Implemented Redis semantic caching for repeated queries, LangGraph-based conversation memory management, and GCP deployment using Docker and GitHub Actions CI/CD.

AI Manim Video Generator

Jul 2025 – Aug 2025

video.surajpatel.dev | github.com/SurajPatel04/manimVideoGenerate

- Architected an AI video pipeline (React, FastAPI, MongoDB) with an **agentic LangGraph workflow**, using a dynamic routing node to select optimal prompts for generating executable Manim animations.
- Engineered a self-healing generation loop with Vision QA, utilizing Vision LLMs (GPT-4o-mini/Gemini) to visually validate rendered frames against user intent, improving execution success rates from ~60% to over 90%.
- Built a scalable, asynchronous rendering architecture leveraging Celery, Redis, and Supabase to support concurrent generation, real-time polling, and in-flight task cancellation, secured via JWT and Google OAuth.

Education

Master of Computer Applications (MCA)

2024 – 2026

Amity University Online

Noida, India

Bachelor of Science

2021 – 2024

Lucknow Christian College

Lucknow, India
