Profile Summary

Software Engineer specializing in high-performance backend systems, real-time streaming architecture, and agentic AI workflows. Experienced building scalable REST APIs, RAG pipelines, and LLM-powered applications with Node.js, FastAPI, and LangGraph. Proven record of latency optimization and production deployment on cloud infrastructure.

Technical Skills

Languages: JavaScript, TypeScript, Python

Frontend: React, Redux, HTML5, CSS3

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, OAuth 2.0

Databases & Caching: PostgreSQL (Prisma), MongoDB (Mongoose, Beanie), Redis

AI: LangChain, LangGraph, LangSmith

Tools & DevOps: Docker, Git, GitHub Actions, Celery (Task Queue System)

Core Fundamentals: Data Structures & Algorithms, System Design

Professional Experience

Full Stack Engineer Intern

Dec 2025 – Present

Careerboat.ai

- Developed AI interview APIs using Node.js with LangChain and LangGraph, generating context-aware questions based on resumes, skills, and prior responses, while optimizing token usage through state management using MongoDB check pointers and dynamic context summarization.
- Orchestrated TTS, AWS S3, and SSE for real-time audio streaming and token-by-token AI responses.
- Developed an AI-powered resume analyzer to evaluate job description match rates, identify skill gaps, and dynamically generate tailored resumes.
- Orchestrated the Razorpay payment gateway to process secure user transactions, implementing custom backend logic to support discount coupons.

Projects

InsightFlow | insightflow.surajpatel.dev | github.com/SurajPatel04/ai-multimedia-rag-app

May 2026

- Engineered a full-stack multimodal RAG platform (FastAPI, LangGraph, React, MongoDB, FAISS, Redis, SSE) enabling Q&A over documents (PDF, Word, Excel, CSV) and media (audio, video) with inline source citations.
- Designed a two-phase ingestion flow that promotes uploads only after confirmation and cleans up the rest, eliminating wasted embedding spend on unconfirmed files.
- Integrated Deepgram for timestamped transcription with clickable media citations, enabling precise retrieval and playback to the exact second.
- Implemented Redis semantic caching for repeated queries, LangGraph-based conversation memory management, and GCP deployment using Docker and GitHub Actions CI/CD.

AI Interview | interview.surajpatel.dev | github.com/SurajPatel04/AI-Interview

May 2025 – Aug 2025

- Engineered a full-stack AI-powered interview system using React, Node.js, and MongoDB, generating context-aware questions from resumes, skills, and user responses using LangChain and Gemini.
- Engineered a real-time interview system with WebRTC and Socket.io, integrating streaming audio and TTS, reducing next-question API response latency from ~8-10s to ~3-6s using Redis caching.

Education

Master of Computer Applications (MCA)

Amity University Online

2024 – 2026

Noida, India

Bachelor of Science

Lucknow Christian College

2021 – 2024

Lucknow, India
